Course Synopsis:

Title: Diagnosis and management of common oral pathological lesions

- Learning Objectives
 - Recognize and describe the clinical features of common oral pathologic lesions
 - Formulate a clinical differential diagnosis utilizing a systematic approach
 - Develop an appropriate treatment and/or management plan for common oral pathologic lesions, including surgical techniques
- We discussed surgical planning, biopsy techniques, instruments used for biopsy, intraoperative techniques for basic lesions, lab forms, steps involved in sending a specimen to the lab, and hemostasis
- We also discussed cases of common oral pathologic lesions and how to formulate a diagnosis or differential diagnosis

Title: Grafting options for patients with minimal alveolar bone

- Learning Objectives
 - Recognize and describe common clinical scenarios where patients may benefit from bone grafting
 - Understand the differences between various grafting materials
 - Develop an appropriate treatment and/or management plan for patients missing bone
- We will discuss surgical planning, instruments used for biopsy and intraoperative techniques
